## **8.18 REMOVABLE PARTITION BASKETS**

### **8.18.1 GENERAL INFORMATION**

This supplement was originally approved by EASA under Approval Number 2004-6291 as Supplement 25 to Flight Manual, Issue 9 on 19 June 2004.

Issue 1 of this supplement has two pages.

There are no additional continued airworthiness requirements associated with this supplement.

### **8.18.2 LIMITATIONS**

#### **8.18.2.15 BASKETS**

6. Where baskets with a removable partition are used, the partition must be fitted for flight.

### **8.18.3 EMERGENCY PROCEDURES**

No change.

### **8.18.4 NORMAL PROCEDURES**

#### **8.18.4.3.2 Basket Rigging**

##### **8.18.4.3.2.1 Removable Partition Baskets**

With the basket upright, the removable partition should be dropped vertically into position, and will only locate into the floor when correctly oriented.

When the partition is in position, the partition top frame ends will be seated in the partition locating lugs, and the locating holes will be aligned.

Insert the two locking 'pip' pins through the locating holes in the partition locating lugs to retain the partition.

**8.18.5 WEIGHT CALCULATIONS**

No change.

**8.18.6 BALLOON AND SYSTEMS DESCRIPTION**

No change.

**8.18.7 BALLOON MAINTENANCE, HANDLING AND CARE**

No change.

**8.18.9 EQUIPMENT LIST****Table 6 - Cameron Baskets**

| <b>Basket Category</b> | <b>Drawing Number</b> | <b>Basket Description*</b> | <b>Applicable Cylinders</b> |
